ADDRESS

Dalian city, Liaoning, China

EDUCATION

Dalian University (Bachelor of Computer Science) 2012 - 2016

LANGUAGES

Chinese (Native)

English (Professional)

As a Full Stack Developer with 8 years of experience in software development, I've acquired a diverse set of skills with a main focus on JavaScript and its vast ecosystem.

The different kind of projects I've worked with in the past has led me to used lots of various technologies and taught me how to best adapt to new situations, whether technically or socially.

Self employed Full Stack Developer

2018 - Present

Dalian, China

I am working as a self-employed full-stack web developer.

I work by contact with companies or contribute to the developer team as a full stack developer.

Full Stack Developer

2022.2-2022.7

GiftCash Company

I worked in this company as dev team memeber.

We handled requests from clients for selling their giftcards or buying giftcards from our platform.

Full Stack Developer

2021.3-2021.12

Divizend Company

I worked in this company as an individual full-stack web developer.

I worked directly with the CTO of this company.

I built several websites for this company.

Ionic App developer

2021.1-2021.4

skills4school Company

I built a company news app for this company using Ionic React.

I implemented a lot of features that the CEO required.

I got great experience in app development.

Full Stack Developer

2020.11-2021.7

SonicX Foundation

I worked in the developer team as a Full-stack BlockChain developer.

This group provides a lot of casino websites and e-commerce sites following client's requirements.

Full Stack Developer

2019.4-2020.11

AlphaSwap Company

I worked in AlphaSwap company and my direct client was Vladimir Agaev, the CTO of this company.

AlphaSwap is an investment technology platform, bundling the community's best stock ideas into Data-as-a-Service.

I built this website using React, Redux, TailwindCSS, and Nest.js.

Freelance Full Stack Developer

2017.3 - 2020.3

Upwork.com

I have done tons of works from simple apps to complex projects.

These jobs required me to:

- 1. Fixing bugs.
- 2. Rewrite and refactor existing code to make it maintainable
- 3. Build the company's website.

Main projects I have completed are listed below.

- Giftcash company project

I worked as a full stack web developer.

I got much experience as a full stack developer while working for this company.

The main skills I got more is Laravel, Docker, AWS lamda function.

- Divizend company project

I worked as a full stack web developer.

I have been involved in several tech areas and got diverse practical experiences.

While working in this company, I prepared myself as more professional web developer.

Tech: React-Redux, LoopBack,

- Skills4School company app

I built company news app using Ionic React.

It was great experience as a mobile developer.
